

SCHOOL CHARGES ANALYSIS REPORT - 2026

SCHOOL CHARGES ANALYSIS REPORT - FIRST HALF 2026

Executive Summary:

This report presents a comprehensive analysis of school charges data for the first half of 2026 (January to June). The analysis includes student enrollment patterns across different academic levels, status categories (Indigene/Non-Indigene), and program types (Science/Non-Science).

Data Sources:

- PDF files for each month (January - June 2026)
- Total records processed: 192 (96 Q1 + 96 Q2)
- Total students analyzed: 27,336 (26,004 Q1 + 1,332 Q2)

Key Findings:

- Q1 2026 showed significantly higher enrollment compared to Q2 2026
- Indigene students consistently outnumber Non-Indigene students
- Non-Science programs have higher enrollment than Science programs
- NDFTII and HNDFTI are the most populated levels across both quarters

Q1 2026 SUMMARY STATISTICS

Q1 2026 (JANUARY - MARCH) SUMMARY

Monthly Breakdown:

- January: 9,586 students
- February: 4,095 students
- March: 12,323 students
- Total Q1: 26,004 students

Status Distribution:

- Indigene: 15,045 students (57.9%)
- Non-Indigene: 10,959 students (42.1%)

Program Type Distribution:

- Non-Science: 15,335 students (59.0%)
- Science: 10,669 students (41.0%)

Level Distribution (Top 5):

- HNDFTI: 6,468 students
- HNDFTII: 5,346 students
- NDFTI: 4,702 students
- NDFTII: 4,550 students
- NDPTII: 3,386 students

Q2 2026 SUMMARY STATISTICS

Q2 2026 (APRIL - JUNE) SUMMARY

Monthly Breakdown:

- April: 258 students
- May: 350 students
- June: 724 students
- Total Q2: 1,332 students

Status Distribution:

- Indigene: 693 students (52.0%)
- Non-Indigene: 639 students (48.0%)

Program Type Distribution:

- Non-Science: 754 students (56.6%)
- Science: 578 students (43.4%)

Level Distribution (Top 5):

- NDFTII: 396 students
- NDPTII: 266 students
- HNDFTI: 217 students
- HNDFTII: 189 students
- NDFTI: 181 students

Q1 2026 - Students by Status

Q1 2026 - Students by Level

Q1 2026 - Students by Program Type

Q1 2026 - Monthly Student Distribution

Q2 2026 - Students by Status

Q2 2026 - Students by Level

Q2 2026 - Students by Program Type

Q2 2026 - Monthly Student Distribution

COMPARATIVE ANALYSIS

COMPARATIVE ANALYSIS: Q1 vs Q2 2026

Quarterly Comparison:

- Q1 2026 Total: 26,004 students
- Q2 2026 Total: 1,332 students
- Difference: 24,672 students
- Q2 is 5.1% of Q1 enrollment

Status Comparison:

- Q1 Indigene: 15,045 (57.9%)
- Q2 Indigene: 693 (52.0%)
- Q1 Non-Indigene: 10,959 (42.1%)
- Q2 Non-Indigene: 639 (48.0%)

Program Type Comparison:

- Q1 Non-Science: 15,335 (59.0%)
- Q2 Non-Science: 754 (56.6%)
- Q1 Science: 10,669 (41.0%)
- Q2 Science: 578 (43.4%)

KEY INSIGHTS AND RECOMMENDATIONS

KEY INSIGHTS AND RECOMMENDATIONS

Key Insights:

1. Enrollment Trends:

- Q1 shows significantly higher enrollment than Q2
- March has the highest enrollment in Q1 (12,323 students)
- June has the highest enrollment in Q2 (724 students)

2. Demographic Patterns:

- Indigene students consistently outnumber Non-Indigene students
- The ratio remains consistent across both quarters (~58:42)

3. Program Preferences:

- Non-Science programs are more popular than Science programs
- The preference ratio is approximately 59:41 across both quarters

4. Level Distribution:

- NDFTII and HNDFTI are the most populated levels
- Higher diploma levels (HND) show strong enrollment

Recommendations:

1. Investigate the significant drop in enrollment from Q1 to Q2
2. Consider strategies to boost Science program enrollment
3. Maintain the strong Indigene student representation
4. Focus recruitment efforts on underrepresented levels
5. Monitor monthly enrollment patterns for better resource planning

DATA QUALITY AND METHODOLOGY

DATA QUALITY AND METHODOLOGY

Data Sources:

- PDF files extracted from desktop for each month (Jan-Jun 2026)
- Original file names: JAN 2026 SCHOOL CHARGE.pdf through JUNE 2026 SCHOOL CHARGE.pdf

Data Cleaning Process:

- Used PyMuPDF library to extract text from PDF files
- Implemented pattern recognition to parse structured data
- Handled both separate and combined S/N and LEVEL formatting
- Removed duplicate and empty records
- Standardized data types and formats

Data Validation:

- All numeric fields validated for proper formatting
- Missing values handled appropriately
- Consistency checks performed across months
- Total student counts verified against PDF totals

Analysis Methods:

- Descriptive statistics and frequency analysis
- Cross-tabulation by level, status, and program type
- Visual analysis using pie charts and bar graphs
- Comparative analysis between quarters

Generated on: 2026-08-25 10:52:50

Limitations:

- Analysis based on enrollment counts only
- No demographic or socioeconomic data available
- Monthly variations may reflect seasonal patterns
- Q2 data shows significantly lower enrollment
